

Quantum AI, Quantum Machine Learning

Friday, 8 November 2019 10:20 (20 minutes)

Recent development in quantum technology together with advances in quantum algorithms impacts the field of quantum AI and machine learning. Many quantum machine learning algorithms and their applications to AI are being appeared. We present some of these and also our work in the field.

Presenter: Prof. CHI, Dongpyo (Seoul National University)

Session Classification: Invited talks - Math & Stats 2
